

# Region

The uniqueness of the Bodensee region is based in its healthy and strongly minted mixture of international economy and habitat shaped by Hightech and intact environment. In this region businesses can rely on resources of four highly developed, German speaking countries - Germany, Switzerland, Austria and Lichtenstein. The industrial spectrum of different branches within this region is broadly diversified; key emphasis is based on forms of mobility technologies, air and space technology as well as mechanical engineering and information technology. In addition, new technology fields like pollution-control technology, Life Science, bio- and nanotechnology have grown in the region. About 30 universities and academic institutions provide highest-quality education in an attractive environment.
